PROFESSIONAL SUMMARY

Computer Science student at Sukkur IBA University focused on Artificial Intelligence and Machine Learning. Builds and ships independent projects in Python, Java, and C++, including a movie recommendation system and several full-stack management applications. Comfortable across Data Structures, Algorithms, and Database Management, with hands-on practice in Pandas, TensorFlow, and SQL. Actively seeking internships and entry-level roles to apply these skills in a real engineering team.

EDUCATION

Sukkur IBA University <i>Bachelor of Science in Computer Science (STHP'24)</i>	Expected 2028 <i>Sukkur, Pakistan</i>
--	--

PROJECTS

- Movie Recommendation System** | Python
- Built a recommendation engine that suggests movies based on user preferences and viewing data, applying core ML/data-processing concepts. Source available on GitHub.
- CineVault – Movie Management System** | Python
- Developed an application to organize, catalog, and manage movie data, focused on clean data handling and CRUD functionality.
- Student Management System** | Java
- Built a system to manage student records, applying object-oriented design and database integration principles.

TECHNICAL SKILLS

Languages: Java, Python, C++, Assembly Language, SQL
Data & Tools: Pandas, TensorFlow, NoSQL, Excel, Power BI
Core CS: Data Structures and Algorithms, Database Management, Information Security
Interests: Artificial Intelligence, Generative AI, Machine Learning, Web Development

CERTIFICATIONS

- Data Structures and Algorithms
- Generative AI: Introduction and Applications
